The image shows two software windows side-by-side. The top window is 'TorrentSpy' and the bottom is 'RatioMaker - 0.5'. Red, blue, and green arrows point from specific fields in the top window to corresponding fields in the bottom window. A red arrow points from the Tracker URL in TorrentSpy to the Tracker URL in RatioMaker. A blue arrow points from the SHA Hash in TorrentSpy to the Info hash (SHA1) in RatioMaker. A green arrow points from the Total Bytes in TorrentSpy to the Total bytes field in RatioMaker. A red arrow also points to the 'Connect' button in RatioMaker.

RATIOMAKER 0.5
HOW TO...

- 1) Start Torrent Spy
- 2) "Drag" the .torrent file over TorrentSpy window to get the info you need
- 3) Start Ratio Maker and copy the data from TorrentSpy (remember to remove the separators from "Total Bytes" ex: 729.523.927 -> 729523927)
- 4) Put the amount of MB you want to fake in "Quantity to add" and choose "Add to - Uploaded"
- 5) Select a client emulation and press "Connect". Wait 300s for Ratio Maker to report the fake upload to the tracker

Notes:
- don't fake too much at a time or too often
- the torrent client should be closed during this operation
- choose torrents with many peers to not attract attention
